Dear Alumni and Friends,

As I write this letter, we are navigating the unprecedented situation of the COVID-19 pandemic. The virus is upending our typical routine and its effects are being felt acutely across the campus community, as they are in your communities and around the world. At press time, our faculty have accomplished an incredible feat, transitioning 383 courses to alternative delivery within a week to preserve continuity of learning for thousands of students. Even as our faculty, staff, and students are adapting to a new reality, I am firsthand witness to what you already know: Badgers dig in!

Though much is still unknown about the days and weeks ahead, we wanted to share with you the stories of our progress in the last year—all of which illustrate the impact of our many generous donors and friends.

Thanks to your support, WSB has surpassed its initial fundraising goal of $200,000,000 for UW–Madison’s All Ways Forward campaign by more than $25 million dollars. These funds have directly supported student scholarships, strengthened faculty research and innovation, helped launch new programs like our MS in Business Analytics, and improved the educational experience that we offer.

As the campaign comes to a close at the end of 2020, we look forward to building upon our recent achievements as we embark on ambitious new goals stemming from our strategic planning process. Our new strategic plan, Roadmap 2025, will position WSB to break new ground in business education and respond to rapidly changing forces in the digital economy. Your generous support and investment will allow us to quickly advance the important priorities we’ve outlined in Roadmap 2025, which you can read more about on pages 2 and 3.

Thank you for the many ways you champion the Wisconsin School of Business. I hope the stories that follow will bring you some encouragement and joy during these trying times. The WSB alumni community truly is a source of inspiration for me, and I am grateful for your support. On behalf of the Business Badger family, I wish you and your loved ones well.

OPPORTUNITIES FOR INVESTMENT

FACULTY LEADERSHIP

To achieve our aspirations to become a hub for lifelong learning, WSB needs to grow the size, reputation, and market orientation of its faculty. Investing in our faculty will support anticipated program growth, allow us to respond to emerging trends, strengthen our cross-disciplinary capabilities, and enable stronger partnership across campus.

Named faculty positions provide prestige, recognition, and resources to help the school recruit and attract leaders in their respective fields, and retain high performers who may otherwise be recruited away by other institutions.

Named positions may be endowed at three levels:

- **Distinguished Chairs**—$3 million
- **Chairs**—$2 million
- **Professorships**—$1 million

SCHOLARSHIPS

Scholarships, at both the graduate and undergraduate levels, help WSB remain competitive and accessible to highly qualified students of all backgrounds. This valuable support will recognize merit and help alleviate reliance on loans, making a business education possible for students regardless of their financial situation.

Gifts of any size to the WSB Scholarship Fund will help provide important unrestricted resources to sponsor students in any program. A gift of $50,000 or more can establish a new scholarship endowment to support a program of the donor’s choosing.

WSB FUND

Unrestricted, annual support provides resources to act quickly and invest in urgent, high-priority needs to advance our strategic plan. The highest immediate priority for the WSB Fund is to invest in the student experience through enhanced career readiness and industry connections.

Your WSB Fund gift can have the following impacts:

- **$500**: Fund one student to participate in a career trek with corporate visits in cities like New York, Chicago, or San Francisco
- **$100**: Sponsor one student to attend a student-alumni networking event
- **$50**: 1 hour of career coaching
- **$250**: One student’s travel to a corporate partner site for job shadow or career workshop

WSB VENTURE FUND

We have identified many program innovations to enhance our current degree programs and launch new offerings. Venture funds will provide critical resources to encourage WSB faculty and staff to act quickly and creatively in building and launching new pilots to elevate the student experience. This seed investment fund offers the opportunity for donor partners to collectively invest $4 million in support of program innovations that will enhance the reputation of WSB and generate sustainable funding longer-term. Donors may participate in the WSB Venture Fund by making investments of $25,000 or more.
The Wisconsin School of Business has set a foundation for the future with a reframed mission, vision, and set of values. These core principles will guide our approach as we pursue the key priorities identified in our strategic plan, Roadmap 2025.

**OUR SHARED MISSION**
We imagine, create, and lead the future of business by connecting and empowering a dynamic community of lifelong learners, scholars, and organizations.

**OUR VISION**
We will be a premier global business school, shaping transformational leaders and resilient achievers.

**OUR CORE VALUES**
- Relentless innovation
- Purposeful action
- Empathetic inclusivity
- Impactful scholarship
- Synergistic collaboration
- Unwavering integrity

**OBJECTIVE:** CREATE A GLOBAL PLATFORM FOR BUSINESS BADGER LIFELONG LEARNING

**STRATEGIC PRIORITIES**

**BUILD AND DELIVER A TOP 10 BBA PROGRAM**
An immersive and applied undergraduate program will be the foundation of our lifelong learning platform and a critical springboard for future business leaders. We are planning investments to modernize our curriculum, enrich the student experience, and strengthen career outcomes—resulting in a reputational leap as a top 10 business school.

**CREATE A NIMBLE, MARKET-RESPONSIVE GRADUATE PORTFOLIO**
Building upon the experiential learning strength of our MBA degrees, a more agile and market-responsive portfolio will meet the professional learning needs of our community. In order to create flexibility, accessibility, and personalization at different life stages, we are developing specialized master’s programs in emerging disciplines, innovating within our MBA programs, and building capacity to deliver stackable, on-demand learning.

**INVEST IN RESEARCH IMPACT**
As an influential partner to industry, we will expand and deepen collaborations on complex business challenges to address the needs of the future workforce. To achieve this, we must grow the size, reputation, and market orientation of our faculty with stronger diversity, expertise around emerging trends, and cross-disciplinary capabilities.
“The education I received opened so many doors for me. I believe in the students coming up and am always thinking, ‘How can I help them?’”

—MILO PINKERTON (MS ’79)
When Milo Pinkerton (MS ’79) was 3 years old, he sneaked off on an adventure. It wasn’t anywhere exotic, not like the places he’d visit as an adult. But it set the tone for a life of curiosity and constant motion.

Pinkerton’s dad, Hulbert “Hub” Pinkerton (BA ’47, JD ’50), owned and managed apartment buildings in Madison. As Hub worked on one of the buildings, he stepped away for a moment only to see that his young son had climbed up the ladder and was walking along a ledge outside the second-floor railing.

“My dad said, ‘Don’t move! I’ll be right there!’” says Milo Pinkerton, who has been in that building in the years since and knows firsthand how treacherous his trek was. “My dad thought he better keep a closer eye on me after that.”

Pinkerton has been on the move ever since. A busy real estate developer and philanthropist, Pinkerton is now president and founder of MSP Real Estate Inc., a construction and development company, and Heritage Senior Living, an assisted living/memory-care management company.

“It’s been an evolution that wasn’t planned,” Pinkerton says of his career, reflecting on its twists and turns. Even so, it’s an evolution that has made sense for him.

WORKING AT HIS FATHER’S SIDE
Working with property has always been a focus for the Pinkerton family. His grandfather, George Schoblaska, was a contractor and real estate developer in Manitowoc, Wisconsin. Hub Pinkerton was an attorney and then worked in the revenue department for the state of Wisconsin. His real estate portfolio consisted of four 1910-era properties where he took care of reconstruction and repairs. That provided some early education for his son, and helped lay the groundwork for Milo’s career.
“From my dad, I got a college education in construction and what to do in housing,” Pinkerton says. “He taught me how to do plumbing, electrical, carpet installation, installing roof shingles, all those things.”

There was no question, though, that Pinkerton would get a true college education. That was a family tradition, too—one with deep Badger roots. Besides his dad, Pinkerton’s mother, Delores (BS ’50), attended UW–Madison. So did both of Hub’s sisters, Mila Jean Steinhaus (BS ’44) and Phyllis Pratt (BM ’45, MM ’47), who together founded a women’s club at the university in the 1940s. Mila Jean’s husband, John Steinhaus (MD ’45, PhD ’50) was an alumnus, too.

Yet when it came time to choose a college, Pinkerton went a different route. He wanted to go to architecture school and did so at the University of Minnesota. Beyond the lure of design, Pinkerton wanted to be more involved with a property’s development. Getting a master’s in the real estate program at WSB helped put his goals into focus.

“Throughout my undergraduate years I took business classes because I felt that an architect didn’t have control of the project’s program,” he says. “I always wanted to be on that side of the fence. Coming to Madison to learn more about real estate and being a developer was just the perfect fit for me.”

INSPIRED BY A REAL ESTATE LEGEND
Pinkerton studied under the legendary James A. Graaskamp, impressed with his intellect and wit. Graaskamp’s fundamental philosophy and ethical approach to real estate development resonated with Pinkerton and continues to guide him today.

After Pinkerton earned his graduate business degree, he worked as a project director for a Madison-based construction company that developed low-income housing. He then held positions working with loans that had gone bad, helping property owners restructure debt in the face of foreclosure.

He left the corporate world in 1988 to set out on his own as a real estate developer, renting an office in Minneapolis and cold-calling potential clients. As MSP Real Estate Inc. grew, it branched out from development to construction and property management.

Senior care wasn’t just affordable living, Pinkerton realized, but assisted living and memory care. At first he built separate areas for all, but then realized that it made sense to bring them under one roof. He founded Heritage Senior Living in 2000, opening his first continuum of care facility in West Allis, Wisconsin, a suburb of Milwaukee. MSP/Heritage now has 30 Wisconsin locations that are home to more than 3,000 residents and employ more than 800 people.

As Heritage grew, two particular residents brought Pinkerton’s life’s work full circle—his mother and father.

“My dad gave me a call and said, ‘Son, I thought I’d let you know we rented an apartment today.’ I said, ‘What? You didn’t call me? You could have moved into one of my properties,’” Pinkerton says. “He said, ‘We did, but we didn’t want to bother you.’”

They moved in to a Heritage Senior Living property in Monona, a suburb of Madison. “They were able to extend their lives, provided by loving care staff, to 97 and 99 years young,” Pinkerton says.

PHILANTHROPY FOCUSED ON STUDENTS
Beyond his Midwest-based business, Pinkerton has also branched out to develop real estate in Palm Springs, California, where he and his husband, Virgil Taus, live part of the year.

But his roots still lie in Madison, and Pinkerton makes it a priority to give back to the university and the Wisconsin School of Business. After all, it’s the neighborly thing to do. He grew up four blocks from Camp Randall Stadium and gained early business experience charging $2 to park cars on football Saturdays.

“I’m a townie,” he says with a laugh. “The university has been the center of my whole life.”

Pinkerton is a generous donor to initiatives at WSB’s James A. Graaskamp Center for Real Estate, a reflection of the profound impact that Graaskamp had on his career.

Pinkerton was also one of the first donors to WSB’s Innovation Fund, which
helped create unique learning experiences for students. The Innovation Fund appealed to Pinkerton’s creative side, with a goal of expanding the idea of what education could be.

“Being a real estate developer is entrepreneurial. You come up with an idea and then you make it happen,” he said. “That’s what architecture is, that’s what real estate development is. And that’s what the Innovation Fund does.”

Pinkerton has pledged a substantial estate gift to WSB, but also wants to invest in initiatives for which he can see the result in his lifetime.

“We feel very strongly about education and helping others get their start. We want to be here to see it happen,” Pinkerton says. “The education I received opened so many doors for me. I believe in the students coming up and am always thinking, ‘How can I help them?’”

Pinkerton and Taus also fund a UW–Madison scholarship for LGBTQ students called Milo and Virgil’s Fabulous Fund, as well as other university initiatives. Beyond campus, they support a variety of organizations in the Twin Cities and Palm Springs focused on LGBTQ rights, youth homelessness, and the arts.

LENDING A HAND TO OTHER BADGERS
While Pinkerton works with and helps people who are retired, he has no plans to do so any time soon.

“I keep asking people who are my age or older, ‘What is retirement like?’” Pinkerton says. “A lot of people enjoy retirement. I really enjoy work. I tell the people who work for me, ‘When the fun stops, that’s when it’s time to look for another job. And I still have fun every day.’”

Pinkerton remains on the go all year, going abroad a month each year to spend time with family in Spain. Throughout his travels, he has a goal of hitting all the wine-producing regions of the world.

And despite all his travels, there’s one place that will always feel like home to Pinkerton—the University of Wisconsin–Madison. He remains active with real estate alumni, networking and lending a hand to those just starting out.

“When somebody graduates from this program, it’s a natural to help them and open doors,” he says. “That’s the most important thing we can do.” •
In the business world, the elevator has an important role to play. There is the elevator pitch—that short, succinct introduction to yourself or your business. There is also the elevator that takes the successful executive to their office suite atop a tall building.

For Ross Freedman (BBA ’97) and Brad Schneider (BBA ’97), it was the elevator in their residence hall that would change their lives. A chance meeting there after they first set foot on the UW–Madison campus sparked a friendship and a business partnership, and the two have been moving up together ever since.

Freedman and Schneider have launched two companies together, including Chicago-based Rightpoint, which was acquired in October 2019 by Genpact, a global professional services firm with more than 90,000 employees. Rightpoint, an industry-leading digital consultancy with technology at its core, had grown in more than 12 years from the two friends to approximately 500 employees across 10 locations in the U.S. and India. The acquisition, however, might not even be the duo’s greatest achievement.

“After all these years in business together, we’re still close friends,” Schneider says.

Besides their business careers, Schneider and Freedman also share an affinity for the Wisconsin School of Business and the Weinert Center for Entrepreneurship. Individually, they have contributed to the Weinert Center’s Entrepreneurs Forward Fund, which helps develop entrepreneurial coursework, build experiential learning programs, enhance engagement with community entrepreneurs, and promote cross-disciplinary programming. Last year, Freedman, Schneider, and Rightpoint made a joint gift to the fund and because of their increased support are now recognized as Wisconsin Forward Partners, those who give at a higher level to the Entrepreneurs Forward Fund.

“If you really believe the School is the key ingredient to what made you successful, it’s important to support that for other people, too,” Freedman says.

WORKING TOGETHER FROM THE START

Freedman’s and Schneider’s gifts help ensure that entrepreneurial students have the tools they need to succeed, and the duo’s journey to startup success provides valuable lessons to students as well. Neither had decided on a major or specific career path when they came to college, nor did they know many people at UW–Madison. Yet as Schneider waited for an elevator to take him to his residence hall floor, the door opened and there was Freedman with his mom and dad.

“I remember it like it was yesterday,” Schneider says. “Being a typical freshman, I was content to go to the other side of the elevator and say nothing. But Ross’ parents suggested he shake my hand, so we had this
awkward handshake on the way up to our rooms.”

The two quickly found they shared a flurry of ideas for businesses or projects. After graduating, they both took jobs at the accounting firm Arthur Andersen. They thought their dual degrees in business and computer science would position them to launch a startup one day, and at Arthur Andersen they gained valuable consulting experience and business acumen.

In 2000, they left Arthur Andersen to launch Wired Matrix, a systems integration consulting firm focused on middle market clients. The business began in Freedman’s apartment, where Schneider would sometimes show up for work while his co-founder was still sleeping. A few short months after they launched the company, the dot-com bubble burst and the value of the technology sector plummeted.

“Ross and I looked at each other and thought, ‘What did we just do?’” Schneider says.

ADDING TO THEIR SKILL SETS
They realized immediately what skills they didn’t have—sales, networking, relationship-building—and set about learning them. Wired Matrix moved out of Freedman’s apartment, grew to 15 people, and was acquired three years later by West Monroe Partners. Freedman and Schneider stayed on in leadership roles at West Monroe Partners to help grow the company.
In 2007, they again got the itch to create. They noticed design and technology coming together in ways other companies weren’t recognizing, so they launched Rightpoint. Their approach was to hire the best designers and engineers to create the most impactful experiences for customers, making technology work more efficiently.

Originally, Rightpoint worked with global companies to help them improve their employee experiences through design and technology—adapting existing software such as Microsoft or Salesforce. Schneider and Freedman raised capital and grew the company to 185 people. With a $55 million investment from a private equity firm in New York, Rightpoint expanded nationally, made three acquisitions, and moved into customer interface and mobile technology development.

Rightpoint continued growing, up to 500 employees, with Freedman and Schneider as co-CEOs. After Rightpoint was acquired by Genpact, Freedman stayed on as CEO. Schneider left the company but remains in an advisory role.

“We worked together for 27 years and this is the first time we are not working together on a day-to-day basis,” Schneider says.

Being away from Rightpoint’s daily workings affords Schneider the freedom to explore his and Freedman’s next entrepreneurial opportunity together.

INSPIRING THE NEXT GENERATION

Dan Olszewski, director of the Weinert Center, appreciates the impact Schneider and Freedman have made for their alma mater.

“It is wonderful alumni like Brad and Ross who make our School so special,” Olszewski says. “Their commitment of time and financial support allows WSB to inspire, educate, and launch future entrepreneurs into careers at both established firms and startups. It has an incredible impact on the next generation of Badgers.”

Schneider and Freedman visited WSB last fall and spoke to nearly 60 students interested in entrepreneurship. The two came away impressed by the kinds of entrepreneurship and forward-thinking ideas happening on campus. Those ideas can turn into something far bigger, and no one knows that better than Schneider and Freedman.

“Sometimes you hear success stories and think, ‘I could never do that,’” Freedman says. “But hopefully people hear our story about two guys who met in an elevator and did what we did. That means everyone can do it. It just takes a little bit of courage and passion.”

“...if you really believe the School is the key ingredient to what made you successful, it’s important to support that for other people, too.”

—ROSS FREEDMAN (BBA ’97)
LIFTING AS HE CLIMBS

STUDENT SCHOLARSHIP: CONSORTIUM STUDENT TERRY BRIMLEY PLANS TO USE HIS MBA TO GIVE BACK

BY SIRI PAIRIN | PHOTO BY PAUL L. NEWBY II

Terry Brimley’s (MBA ’20) career is as varied as his interests. From human resources and entrepreneurship to accounting and finance, Brimley thrives on applying his diverse skill set to a variety of roles and fields in the business world.

Brimley, whose previous jobs include compensation analyst at Harley-Davidson, accountant at his own tax services business, and even freelance tutor for college students, grew up in Milwaukee and received his undergraduate degree in finance and accounting from the University of Wisconsin-Milwaukee.

A desire to develop a more strategic background—one that combines his many interests and positions him to make an impact on the community—brought him to the Wisconsin School of Business’ full-time MBA program.

As a student in the Nicholas Center for Corporate Finance and Investment Banking, Brimley completed a summer internship at Northwestern Mutual where he served in an internal consulting capacity, helping the company’s 76 offices run at optimal capacity. With a variety of projects, the internship gave Brimley an invaluable chance to gain experience across many fields.

“I liked that the internship covered an array of different topics within business,” he says. “I had finance projects, an HR project, and a marketing project. The diversity in the work that I did allowed me to expand my skill sets.”

Brimley received a full scholarship to WSB through The Consortium for Graduate Study in Management, a partnership of business schools and corporations that aims to enhance diversity in business education and corporate leadership by providing postgraduate opportunities for underrepresented minorities. He credits a lot of the opportunities he’s been given in the Wisconsin Full-Time MBA Program—like his internship—to the support he’s received.

“I’ve always lived by the motto, ‘You lift as you climb.’ As a Consortium student, not only do I see myself getting closer to my goals, I’m also able to help those behind me.”

TERRY BRIMLEY (MBA’20)

Looking forward, Brimley intends to draw on his varied experience and education to build a career that positions him to give back to the community.

“A lot of society’s problems are attributed to people not having enough money,” he says. “Hopefully the work I’m doing in the future—whether that be in internal consulting, general management, or entrepreneurship—will be helping to eliminate wealth inequalities in this country.

“My mission—whether it’s within corporate America or running a business—is just to help people out.”
Jim Johannes (BA ’72, MS ’75, PhD ’78) considers himself a lucky man. With a couple twists of fate, hard work, and people who looked out for him along the way, he has built a legendary career as a professor of finance at the Wisconsin School of Business and the director of WSB’s Puelicher Center for Banking Education.

But as Johannes gets ready to retire this spring, scores of students and colleagues have reason to believe they have been the lucky ones.

“The impact we can have on our students is the best gift we can give to the future,” Johannes says. “In my view, it’s the most important thing we do as faculty.”

WSB will feel Johannes’ impact well after his retirement—through his students, the strong tradition he has helped build in WSB’s banking program, and myriad administrative roles, including his current service as senior associate dean for faculty and research.

FUNDRAISING IN JOHANNES’ NAME
Johannes’ time at WSB coincides with the emergence of the Puelicher Center as a steady resource for teaching, cutting-edge faculty research, and industry connections. It was founded in 1995.

Gordy Gunnlaugson, chairman of the Puelicher Center board, says the impact of Johannes’ career has been twofold—his industry connections and his teaching.

“Jim has many points of contact with the banking industry that undoubtedly enrich his applied knowledge of the industry,” says Gunnlaugson, retired executive vice president and CFO of M&I Bank. “He has an enthusiasm for the subject of banking that he transmits to his students. His combination of the academic side with real-world experience enriches the students’ learning experience.”

To continue the legacy built through Johannes’ work with the Puelicher Center, WSB is embarking on a $2 million fundraising campaign that will help enhance the administrative abilities of the center, as well as scholarly research in banking. In support of the former, and in Johannes’ honor, WSB has launched a fundraising effort with a goal of $1 million to endow the Puelicher Center directorship in his name. To support the research mission, the Puelicher Center campaign has already created the Chris M. Bauer Endowed Professorship in Banking and Finance through the generosity of the late Chris M. Bauer (BBA ’70), a Puelicher Center advisory board member.

FROM STUDENT TO FACULTY
For as much impact as Johannes had on WSB, his academic career might not have happened but for two strokes of providence. The first came as his senior year at UW–Madison was winding down, and the economics major felt someone tap him on the shoulder and say, “Mr. Johannes, I need to see you in my office.”

It was Eugene Smolensky, chair of the Department of Economics, who wondered about Johannes’ career plans. Johannes said he’d like to go to graduate school but had no money for it and knew he was about to be drafted to serve in the Vietnam War. Smolensky had a different idea.

“He said, ‘The faculty have been watching you and we’d like you to stay and get a PhD,’”
says Johannes, who was unaware he had been making an impression.

Johannes was stunned, and thrilled because the offer came with a scholarship. He agreed to stay in school until he was drafted. As Johannes awaited his fate, President Nixon abolished the draft. Johannes’ education would continue.

**STRENGTHENING WSB’S BANKING REPUTATION**

After beginning his academic career at Michigan State, Johannes returned to his alma mater in 1983 and quickly became an integral part of UW–Madison becoming a hub of banking education. He has taught and held leadership positions at the Graduate School of Banking, a program of advanced management for banking professionals that recently celebrated its 75th year in partnership with UW–Madison.

Through the Puelicher Center, WSB’s banking reputation grew. Courses were added as the industry changed over the decades and as student interest expanded beyond commercial banking to investment banking.

Johannes, who holds the Aschenbrener Chair in Finance and Graduate School of Banking-Prochnow Professor of Banking, has built strong industry relationships. He was a director for the UW Credit Union and John Deere Financial, and ran the finance committee of the UW Athletic Board in the 1990s when the football program became a powerhouse.

“I’ve tried to be a practical academic by keeping my feet firmly entrenched in the real world,” he says. “I can bring banking alive in class because of my real-world experience. I’ve got some great stories after all these years.”

Sometimes when Johannes is teaching, he sees a little of himself—a student working hard to learn.

“When I go into a classroom, I can see how some students are getting it, but can see on the faces of other students that they’re not getting it,” Johannes says. “So I know to stop, say it a different way, make it interesting and practical.”

If anyone knows the value of a WSB education, it’s Johannes—as a student, teacher, scholar, administrator, mentor, and community member.

“I tell people if I talk about the university and sound too excited about it, it’s genuine,” he says. “I owe everything I have today to the good fortune I had going to the University of Wisconsin.”

To learn more about making a gift in honor of Jim Johannes’ many contributions to the Puelicher Center and WSB, contact Rachel Lionberg at rachel.lionberg@supportuw.org.

Alumnus Chris Bauer (BBA ’70), a Puelicher Center board member and passionate Badger, passed away on March 13. We are ever grateful for his generosity and support of the banking education mission at WSB.
Last year, 3,226 alumni and friends gave $1,209,261 to the Wisconsin School of Business Fund, providing flexible, unrestricted resources that help the School remain competitive.

Gifts to WSB’s annual fund support life-changing student experiences, including applied learning projects, distinguished lecture series, global trips, and case competitions. The WSB Fund also supports engagement with business leaders and alumni who share invaluable guidance and expertise with students.

To make a gift to the Wisconsin School of Business Fund, visit go.wisc.edu/wsb-fund
Chandrea Baster (BBA ’21) knows the importance of hard work. Born to Polish immigrants, Baster grew up in a Chicago suburb with a keen appreciation for what it takes to succeed and support oneself. From a young age, she knew she’d grow up to be an independent person.

“My parents came to the U.S. from Poland to give me a better life,” says Baster. “Neither of my parents attained a four-year degree, so as a first-generation student I really value the opportunity to go to college.”

Baster, whose first language is Polish, discovered her predilection for languages after learning English as a child. Since sixth grade, she has been learning French and has continued these studies at UW.

A double major in marketing and French, Baster hopes to eventually work for an international company and maybe even live abroad. Though she isn’t sure what job she’ll pursue after graduation, Baster hopes her semester studying in Paris will inspire and inform her career goals.

“I’m looking forward to being out of my comfort zone,” she says. “I think it will be awesome to learn the French ways and norms, and how they approach marketing—and how it differs from the United States’ approach.

“Gaining that different perspective will expand my horizons,” she says. “If I do end up working abroad—or even here in the States—drawing on that will help me when communicating with individuals from other countries.”

Baster, who is paying her own way through college, received a scholarship from donations given on Day of the Badger. She says the support she received has helped relieve some of the pressure of paying off student loans.

“I never had a college fund because, as immigrants, my parents didn’t have the means to provide money for college while also supporting our family as I grew up,” she says. “All of that is on me now. It sounds so cliché, but every little bit helps.”

Day of the Badger, UW–Madison’s annual day of giving, encourages alumni, students, and friends to make a donation, show their pride, and stay connected to the university. WSB took part in the inaugural Day of the Badger in 2019 and will participate again in the university-wide campaign later this year.

Baster feels a strong connection to alumni—not just because of the scholarship she received, but also because she witnessed their generosity while working for Badger Call during her freshman year. At Badger Call, she spent time on the phone talking to UW alumni, discussing the power of philanthropy and hearing their stories.

“Since working for Badger Call, I’ve had a strong appreciation for UW alumni because I’ve seen how much they give back to the university,” she says. “I appreciate that others are giving so much to students like me. That support is just incredible.”
By the time Rachel Greenberg (BBA ’20) and Teddy Weber (BBA ’20) begin their jobs on Wall Street after graduating this spring, they’ll be wandering the Big Apple like native New Yorkers. After all, getting to know the place was in some ways part of their finance education at the Wisconsin School of Business.

Student treks to the city, networking opportunities with alumni, coaching from professionals in their field, and on-campus preparation about what it’s like to work on Wall Street are just some of the career pathway services available to WSB undergraduate students. Many of these initiatives are funded through philanthropic gifts aimed at ensuring Business Badgers get the career resources they need to succeed.

“We’re a very high-touch program,” says Jamie Macias (BA ’02), director of career services for the Wisconsin BBA Program. “There are a lot of one-on-one relationships with our students and we keep in touch with our students when they become alumni. Then they come back to recruit the next batch of Badgers.

“It’s very much what I call the ‘circle of life,’” Macias added.

A generous gift created the BBA Career Development Fund in Spring 2019, providing further resources to BBA students so they can pursue experiential learning opportunities, receive travel stipends for company visits, and participate in internships that match their interest, regardless of compensation.

“We want to create access for everyone,” Macias says.

The BBA Career Development Fund and other related initiatives have a proven track record for students studying finance. It’s the largest undergraduate major at WSB, with more than 1,200 students. It’s also extremely competitive.

“Key employers in finance are trying to front-run one another for talent and, as a result, want to interview our students even earlier,”
“We have a unique relationship with our alumni and donors who are always looking to be mobilized in support of our students. Faculty, students, and alumni—it’s like a family that has worked together to make it happen.”

— JAMIE MACIAS (BA ’02)
DIRECTOR OF CAREER SERVICES, WISCONSIN BBA PROGRAM
As an ever-evolving educational landscape drives the demand for more flexible learning opportunities, the Wisconsin School of Business is prioritizing the development of alternative delivery modes to serve students via high-quality online learning opportunities throughout their lifecycle as a learner.

Since 2013, philanthropic investments have enabled WSB to evolve the educational opportunities available to learners by strategically transitioning high-demand courses from traditional classroom delivery to also be offered in blended and online modes. In moving learning beyond the boundaries of a physical classroom, students gain flexibility and access to high quality learning opportunities with significantly less disruption to other aspects of life.

“Students find that taking online courses opens doors for them to advance their education without needing to physically be on campus,” says Chris Dakes, director of educational innovation and learning design at WSB. “Students who study abroad or do internships can still take courses, and learners with other life circumstances that require flexibility can find online learning opportunities that are directly related to what they’re doing in their day-to-day lives.”

For many students entering college today, learning through on-demand, online modules is a natural progression from their pre-college life as digital learners. They have grown up with broad access to technology and online educational environments, making the transition easier for them to learn and interact beyond the traditional face-to-face format.

“I think online discussions allow students to go more in-depth and think carefully about their responses in ways they might not
in an in-person class with more limited time,” says Cameron Neusen (BS ’19), who took Introductory Financial Accounting online last summer.

Neusen, like many other students, found that WSB’s online course offerings open new avenues to pursue business education. She studied personal finance through the School of Human Ecology as an undergraduate and used WSB’s online introductory accounting class to prepare for entrance in the Graduate Master of Accountancy (GMAcc) program.

Starting in Summer 2020, non-business majors pursuing the Certificate in Business will be able to complete required courses in an online format, providing students with more opportunities to complete popular business courses in the summer while keeping them on pace with their graduation timeline.

As WSB pursues advancements in online delivery, leaders in educational innovation are focused on high quality learning experiences, academic integrity, and student ownership of learning when designing digital courses and choosing the technologies to support them.

“There’s a level of intentionality and rigor that goes into the design and review of online learning,” says Dakes. “Instructors and instructional designers collaborate on the design and development using a well-defined set of criteria. All this adds to a thoughtful, consistent, and intentional approach to how a course is designed.”

“The key with online learning is to think quite broadly about how we can create multipurpose modules that fit the needs of many different kinds of learners at different points in their journey,” says Ron Cramer, strategic learning technology consultant at UW–Madison who has worked extensively with WSB. “It’s important to have faculty go through development programs and take what they’ve experienced in the classroom and then think about it in the online context.”

WSB faculty and instructors are proactively considering how to best translate student engagement in traditional classroom activities to an online space.

“Research on online learning identifies student engagement and faculty presence as key ingredients for the efficacy of online courses,” says Terry Warfield, PwC Professor in Accounting and Richard J. Johnson Chair of the Department of Accounting and Information Systems. “In moving to online delivery of Introductory Financial Accounting last summer, we implemented tools such as discussion boards, text-based homework with feedback, and interactive tutorials to facilitate student engagement. These technologies help students feel the presence of their instructor in the course.”

To date, WSB has focused much of its growth in online classes during Summer Term, a time when students are able to work, intern, and live anywhere and still take high quality courses. Online courses saw the highest increase in enrollment over the past two summers, with students taking popular foundational classes like General Business 306 and Marketing 335 that typically fill up quickly and are difficult to get into during the regular semester.

“Taking an online course during Summer Term allowed me to knock out three credits while living at home and working a summer job,” says James Domach (BBA ’22), who is majoring in finance, investment, and banking. “Being able to take an online class in the summer can be beneficial to all students who might want to lighten the credit load of a future semester.”

In addition to taking standard business courses online, WSB has launched a number of offerings unique to the online space. A new MBA Bootcamp, for example, prepares incoming non-business students for graduate courses through a series of self-paced, digital modules that teach basic business concepts. Marisa Mackey Palmer (BS ’99), a senior lecturer in the Department of Finance, Investment, and Banking, developed a 9-module online course in financial modeling that prepares business students for careers in investment banking. The modules are also available to other learners on campus as a non-credit, open educational resource. These courses, which offer students flexibility in pacing and location, speak to online delivery’s potential to widen both reach and accessibility.

Looking ahead, WSB will continue to serve students through innovative investments in online learning. A proposed redesign of the evening MBA program would feature a blended format of delivery, with 50% online and 50% in person. The reimagined program, called the Professional MBA program, offers the flexibility that working professionals seek through online delivery while retaining the strong cohort and relationship building that is unique to face-to-face delivery. Built to be a platform that enables innovation, the program would also introduce a curriculum designed around a system of digital badges that allow students to customize their program based on their career interests. The proposal is moving through the university’s shared governance processes, and if approved, would be implemented in Fall 2021.

By making the design and delivery of top-quality online classes a strategic priority, WSB can benefit learners beyond the boundaries of the traditional classroom. Not only do today’s students expect to be able to learn in flexible, online formats, they thrive in it. In meeting that demand, WSB can become a hub of lifelong learning, serving students and alumni throughout their career—whether in a classroom or on their computer, wherever they may need to be.

This story was written prior to the COVID-19 pandemic and subsequent transition to alternative delivery for all our courses. Knowing that digital learning will be critical to the future of a flexible, responsive business education, we made significant progress in online delivery in 2019. As the COVID-19 situation evolves, we have seized the opportunity to adapt, learn, and enhance our online learning capabilities.
In 2015, the university publicly launched its most ambitious fundraising campaign to date. As part of the All Ways Forward campaign, we’ve identified key areas in which you can have a significant effect on our future success.

ALUMNI MAKE ‘DAY OF THE BADGER’ A SUCCESS

UW alumni showed their support in a big way on the inaugural Day of the Badger in 2019. During this special university-wide campaign, Badgers everywhere celebrated WSB and UW–Madison by making a donation, wearing red, and staying connected.

Thanks to the generosity of donors and friends, WSB raised more than $320,000 to the WSB Scholarship Fund. Two generous match donors, Bruce Ellig (BBA ’59, MBA ’60) and Barry Gerhart (PhD ’85), doubled the impact of gifts by pledging a $150,000 match.

WSB students share their school spirit on Day of the Badger.

WSB students share their school spirit on Day of the Badger.

DAY OF THE BADGER 2019
BY THE NUMBERS:
50 states drew donors to UW–Madison
337 donors gave to WSB
230 made gifts of less than $100
Michael Medenblik (BA ’19, MS ’20) always had a knack for numbers. As a young boy growing up in the Madison area, he recalls rushing to retrieve the morning newspaper so that he could analyze the box scores from sports games.

When he came to UW–Madison for his undergraduate degree, he capitalized on his aptitude for numbers and majored in math and statistics. What he didn’t initially realize, however, was that he wanted something more practical. During his senior year, Medenblik had the opportunity to do research with WSB’s Margie Rosenberg, a professor in risk and insurance and the Assurant Health Professor in Actuarial Science. She suggested the MSBA as a way for Medenblik to pursue a different career path while still utilizing his math skills.

“As soon as I saw it, I felt like it was the program for me,” he says. “The program is teaching me business fundamentals as well as how to apply them as a data and analytics professional.”

Michael Medenblik (BA ’19, MS ’20)

“Math and statistics always just came much easier to me than anything else, really,” he says. “As my undergraduate courses became more advanced, the math got more abstract, and it became much less interesting to me. I just knew I wanted something more practical.”

During his senior year, Medenblik had the opportunity to do research with WSB’s Margie Rosenberg, a professor in risk and insurance and the Assurant Health Professor in Actuarial Science. She suggested the MSBA as a way for Medenblik to pursue a different career path while still utilizing his math skills.

“As soon as I saw it, I felt like it was the program for me,” he says. “The program is teaching me business fundamentals as well as how to apply them as a data and analytics professional.”

“It’s a great learning environment,” he says. “Our class is about 25 people and all our professors are really specialized and dedicated to this program’s success.”

“We view this new business analytics program as supplying a critical piece in advancing industry and in developing a skill set that’s going to be important for businesses in the future,” says Daniel Bauer, associate professor of risk and insurance and academic co-director for the program.

Medenblik received a scholarship toward the MSBA program tuition thanks to a pool of donor-funded scholarships designed for early participants of the program. He says the support helps him dedicate more time and energy to his education.

“I feel really blessed to have received this scholarship,” he says. “Scholarships for specific programs can really impact a person’s life and career.”

After graduation, Medenblik will start at Epic, one of the nation’s leading health care software companies, as a technical solutions engineer.

Although he’s excited to apply his new MSBA degree at Epic, Medenblik still dreams about one day satisfying his childhood dreams and working in a sports analytics role.

“It’d be great to be able to combine my love for sports with my love for numbers someday,” he says. “For now, I’m excited to start my new role and connect with other people who are as passionate about data and business analytics as I am.”

Scholarship support helped Michael Medenblik further his education with WSB’s new master’s in business analytics.

“As soon as I saw it, I felt like it was the program for me. The program is teaching me business fundamentals as well as how to apply them as a data and analytics professional.”

Michael Medenblik (BA ’19, MS ’20)
WHY I GIVE

“I am a strong believer that education opens up doors that may not otherwise be possible. My sisters and I are the first women in our family to graduate from college and to work outside of the home. By giving back to the Wisconsin School of Business, I hope to make the success I found a reality for other first-generation college graduates.”

— PUNKAJ GUPTA (BBA ’01)
ASSOCIATE DIRECTOR,
FIELD REIMBURSEMENT, ALKERMES
Today, private support is more critical than ever. The generosity of our dedicated donor community makes a difference in everything we do, from supporting faculty, staff, and students to informing and delivering new and innovative learning experiences.

With your support, we have expanded our capacity to attract and provide scholarships for the next generation of talented Business Badgers. We have been able to integrate and scale the best of our learning experiences that prepare our graduates well beyond their first jobs.

We have recruited and retained collaborative, innovative faculty who incorporate leading research into student learning. We have reached across disciplines to foster innovation and inspire future business leaders.

Together, our dedicated giving community has helped protect the quality of students’ education, which continues to grow our impact and visibility. You keep our community strong, and for that we thank you.

WISCONSIN NAMING GIFT

In 2007, 13 alumni came together to create an $85 million naming gift to preserve the School’s name for at least 20 years. The Wisconsin Naming Partners pioneered a new era for the Wisconsin School of Business, providing critical funding to support significant growth in our faculty and student body. Since its inception, the partnership has grown to include 17 members and more than $110 million in investments. We remember and honor those partners who are no longer with us: Pete Frechette and Albert O. Nicholas.
